GENERAL NEWS OF INDUSTRIES

According to the latest report there are now 1,870 miles of railway in Japan, of which 1,319 miles are owned by priwate companies. At the present time 62 applications for new railroad con-cessions are under the consideration of the authorities of that country, the total length of the projected lines being about 1,400 miles. It is naded that the Japanes - government has in view to build 1,261 miles of railroad during the next twenty years, which will bring up the length of the state lines to about 1,815 miles. The Japanese are sufficiently cosmopolitan to go to the cheapest markets for their supplies of material and machin-They are at the present moment ordering a considerable quantity of sugar refining and textile machinery England, and they draw their rails, locomotives and other railway mater-ial-when they do not manufacture it themselves-with the most absolute impartiality from England, Germany and the United States, while they appear to fancy France for the armor plates and other war material, although they have recently ordered some Harvoyized armor plates from

The Enrien Iron company, of Troy, N Y, sets an example that might well be followed by all employing corporations with tenefit to all concerns t. The Burden company has no controversies with its thousands of employes. Why? Because, according to the Troy Telegram, the company deals honestly with its help and the men have entire con-fidence in the corporation. The operatives are well aware that when the condi ion of the market warrants it there will be an advance of wages all along the line without the neking So, too, when the prices have a downward tendency they are furnished with proof of the fact and readily submit to reduction which they know to be just. But this is not all. Many years ago the company isaugurated a policy of awarding prizes to the men doing the best work in the s varai departments. This encouraged the men to be steady and phinstaking tor, has received too and it is a matter of great satisfaction the Duchess of York. to them to know that their efforts to to them to know that their efforts to do the best work are appreciated. Then, too, the artisans are well aware that the profits of the business are not frittered away by paying large salaries to a lot of crusmental employee. There is no room for drones in the Burden hive All who are employed there have to work, no matter what may be the position they fill. There is not of rules in force at the the Burden works which all must observe. No infractions are permitted. Every workman is protected in his individual rights and the humblest laborer understant of the truth, "an imperiate of the truth," "at moustrons bill," "attack upon exceed rights of property," and yet these deluded people hope to kill the disestablishment bill. No infractions are permitted. Every workman is protected in his individual rights and the humblest laborer understands that unfair treatment by a foreman is sure to result in the diamissal of the latter of the complaint of the la-larer is sustained by the facts. So, too, memployes well know that the orders mays rules. The Barden Iron company, in the Telegram's opinion, is a rand institution, and it all manafacturing concerns were run on the same | The Liberals have already scored

Says a Pittsburg dispatch; A new deal is in progress in connection with the proposed new trunk line railway system which is to enter Pittsburg. By the new plan three different railroads running in three directions will he centered here. They are the Buf-falo, Rocuester and Pittsburg rallway, the Beach Creek rallway and the Pittsburg Shenango and Lake Erie. The Buffalo, Rochester and Pittsburg is the new party to the deal. At present it has no way of reaching Pittsburg ex-ce, tover the Lebiga Valley railroad tracks from Dutois. The south-Submattawney, where the Beach Creek line also terminates. From there it runs directly north to Boffile and Recliester. By the construction of about forty miles of track the two lines can reach Bruly's Bend. From the resent southern terminus of the Pittslearn Shenango and Lake Erie road at Bather to Brady's Bend is only thirty miles, and by the extension of their line over the route already staked off, the "Peasley," as the the Pitisburg, Slienango and Lake Erie is generally celled, would j in the other two lines. From Brady's Bend south to Pittsburg the new sch in provides for the joint construction of a double track line by the three railroads.

Baltim readvices are to the effect that an important enterprise is under way, which has for its aim the consolidation of the Baltimore and Eastern reilroad, the Choptank steambout company, which it controls, having purchased some months ago; the Maryland Steamboat company, and the E etern Shore Steamboat company. This will give the company controlling these lines almost a monopoly of the eastern shore trade. Joseph B. Soth, who was one of the promoters of the Eastern Score railroad, says a New York evn-dicate has been formed with \$500,000 to put the road, which is now in the re c-iver's hands, on a sound basis. A project is nending to extend the road from Eiston to Chestertown, where a connection will be made with the Elk tom & Southerland road; also to Child's atation, on the Baltimore and Onio. The Baltimore & Onio and Jersey Cen-

MINOR INDUSTRIAL NOTES:

The Wilkes-Barre shops of the Lehigh Valley are to be enlarged and improved. The business of the Hazleton postoffice has increased to such an extent that the postoffice inspector has recommended that

the present quarters be enlarged. All judgments against old companies having been met, the Pennsylvania Midland will put engineers at work upon un-finished portions of the line.

It now begins to appear as though that that thrice abandoned South Mountain road is to be built between Harrisburg and Hamburg, Berks county, with a branch to Strasstown. Connection would be made with the Pennsylvania at both

The Rogers locomotive works are build-ing twelve engines for the United railroads of Havana, two for the Cardenas and Ju-care system of Cuba, and have just re-ceived an order for five consolidated ma-chines from the New York, Susquehanna

chines from t Railway superintendents say that it was very fortunate that there were a few days between the strike of the coal miners and that of the American Railway union, as it enabled the roads to get in a supply of coal that will keep them moving their trains

without trouble. There is now said to be little doubt that the Reading company will carry out the projected plans of running a branch into Benver Meadow. Crews are daily removing the cars that are in stock from the Tamaqua, Hazieton and Northern branch. If the new link is built this branch will be

out in use from Hazleton Junction, near but in use from Hazleton Junction, near Lofty to Tresckow, and at that point a connect ion will in all probability be made to the proposed extension. An opportunity of this kind that will place the Tamaqua, liazieton and Northern branch, which has been temporarily abandoned for some time, in operation, will be gratefully received by the Reading.

Carbondale and Scrauton was run. One of the most gentlemanty and popular conductors of the Delaware and Hudson at the present time, Mr. Skeels, was one of the train hands at the time and has been employed ever since. Time has dealt gently with him, and attnough the silver threads have appeared. with him, and atthough the silver threats have appeared among the gold, he seems to have lost none of the sprightliness that stood him so well in hand on the old gravity read, where the writer knew him twenty-eight years ago."

NEWS NOTES FROM WALES.

Social Correspondence.

Loxdon, July 8.—Assisted Smith, the Weish millionaire slate quarry owner, contemplates running an electric railway from the beautiful rown of Lbanberis to the top of the far famed Snowdon mountain. Thousands of our American cottsins climb Snowdon, and the railway will be greatly appreciated.

Dr. John Williams, the royal Weish doctor, has received thousands of congratulations upon his successful attendance upon

The Duke of Westminster's Welsh election fund is exciting great interest. At the next election Wales will be one boiling employes well know that the orders their superiors must be obeyed. must of political hot pot. Every seat will be longht to the bitter end. People have a right to do what they may with their Consequently there is unison every- own, but novertheless it seems a wicked where and as a result contentment al- waste of \$80,000 to encourage unnecessary ways rules. The Barden Iron comtion in which the two parties are equally guilty.

principles there would, it thinks, be permanent conquest and they are to be very little friction between capital and sympathized with, that is, if any political leserves sympathy. Out of thirts four Welsh members, thirty-one are Liber-als, elected solely upon the disestablish-ment ticket, but late in the day Lord stisbury domands a religious consus of

> The church is admitted to be the strongare chorer is admitted to be the strong-est individual denomination, and in a re-ligious census would show up very favora-bly, but when the national will has been so clearly expressed in the ballot box the demand of his Lordship is too ancient and superfluous.

The Albion colliery disaster is still the absorbing topic and recalls other similar catastrophies in South Wales. "Inc Great Western colliery explosion in 1893 caused 63 deaths; in 1892, the Tandy (Park Slip), in 1899, Abasychan, 176 deaths; and expecially the Aberearn explosion in 1878, when 268 lives were lost, comes almost parallel to the present disaster.

There is one feature in the last disaster which is of more than national importance, viz: that Mr. Robson, the mine inspector, selected this colliery some time ago as a typical dry and dusty colliery and the result of the experiments on the coal dust was that the dust of this partienlar colliery was found to contain a greater combustive power or, in other words, a greater amount of inflammable mixture than any other in the United Kingdom,

Owing to the "double shift" system in this colliery the only opportunity to re-pair the roads and clean the great accumu-lation of coal dust is on Saturday aftersoon and about 300 men are put upon the

The opinion expressed by "Mabon"seems an excellent one to account for the cause of the explosion: About 200 men were at the time engaged in clearing the fire cost dust off the roads so that while this wa going on the whole ventilation of the colliery would be charged with this explosive substance. At the same time the road re-pairers would be upon the work of putting the reads in order, binsting down the timber and rooling according to the tractice at this colliery. What happened? There shots dislotge an enermous amount of rubbish and gas if it lurks in the vicinity.

One of the shots produced a flame, this fired the disledged gas and rubbish in a ventilation already too inflammable and dost laden owing to the simultaneous work of the men clearing the dust.

One point to be cleared at the inquest will be: The managers had been apprised tral roads are said to be backing this of the highly dangerous nature of the coal project.

of the highly dangerous nature of the coal dust and yet they allowed 250 men to disturb the combustive dust while another 100 men were dislodging rubbish and some of them blasting with dynamite.

> It does appear that some one in anthority should either satisfactorily explain this apparent mismanagemet or be made to suffer, as some slight retaliation for the huge sorrow which has been enused.

FINANCIAL AND COMMERCIAL.

Stocks and Bonds NEW YORK July 13 .- Reports that Pres ident Cleveland would appoint two com-missioners to assist Labor Commissioner some time, in operation, will be gratefully received by the Reading.

After ten months of reduced time and reduced force the Lehigh Valley shops at Hazleton have started up and resumed the old order of full time with a full set of employes. At these shops over 500 are employed. The Juniata shops of the Pennsylvania system at Altoona have also started up on full time with all the men the shops can handle.

The receives of the Pennsylvania full set of the firmness and belated shorts came in the shops can handle.

The receives of the Pennsylvania full set of the firmness and belated shorts came in the shops can handle. Wright in an investigation of the causes of started up on full time with all the men the shops can handle.

The receivers of the Reading show a determination to develop the coal traffic of their lines, in which, says the Indianapolis Journal, they ace much on the suggestion of C.E. Henderson, formerly general manager of the Isdiana, Bloomington and Western, now general manager of the contant iron interests of the Reading.

The Jessup Courier says: "Just twenty, three years ago last Wednesday, July 4, 1871, the first Delaware and Hulson passenger train over their steam read between Carbondale and Scratton was run. One of the most gentlemanly and popular containing the content of the state commerce law. Sugar, Gas and Lead were strong. Distillers broke from 24 to 21% and sues quently recovered to 24 to 21% and sues quently recovered to
